

New for 2002

We have expanded our floor space with the **addition of 3,000 square feet** to the back of the building giving us an overall total of 13,000 square feet. This new square footage allowed for expansion to our CNC and EDM departments as well as a new layout for our Quality Control department.

The CNC area has acquired a new CNC machining centre, the **Brute V1600**, increasing our machining capacity to even larger sizes. With five verticals and one horizontal, along with our new addition, our CNC department is ready to meet and or exceed our customers standards and or requests with meticulous accuracy and quality. **Enterprise Mold** is committed to customer satisfaction, quality tooling and accuracy using the latest in state of the art technology, all handled, and run by qualified and experienced personnel.

Our new **EDM machine** further enhances our capabilities to satisfy our customers needs efficiently and in a timely fashion. We are excited and proud to offer you, the customer, these new additions to our facilities. We will continue to update and improve as the years progress as we strive to meet and exceed our customers goals and requirements.
